Subject: RE: San Jacinto National Remedy Review Board

Bob,

Yes, this summary is for the National Remedy Review Board, for their consideration; and may include any issues you would like to raise, and may include any thoughts on what the remedy should be for the site, and why. The comments on the FS are specific for that document; also the FS does not include a recommendation for the preferred remedy, so this is your chance to express an opinion/recommendation on that.

Subject: RE: San Jacinto National Remedy Review Board

Gary,

Thank you for the opportunity to submit a summary. So I'm clear, is this summary separate from the Harris County revised FS review and comment??

Subject: FW: San Jacinto National Remedy Review Board

Bob,

The EPA has scheduled a National Remedy Review Board (NRRB) meeting for the San Jacinto River Waste Pits Superfund Site. The NRRB reviews proposed high-cost cleanup decisions to help evaluate whether they are consistent with current law, regulations, and Agency policy and

9594771

guidance. The meeting is scheduled for April 28, 2014.

The NRRB is a technical and policy review group made up of members that have experience with both regional and Headquarters perspectives in the Superfund remedy selection process. Its members include senior managers and technical experts from each EPA region, as well as senior technical and policy experts from other EPA offices. The product of the review is a memorandum sent from the Board to the regional Superfund division director that documents the Board's recommendations about the proposed cleanup strategy.

Harris County may prepare a summary in writing, 20 pages or less, regarding any technical issues they believe are pertinent to the cleanup decision, including your recommended approach and rationale for that approach. I will attach this summary to the site information package that will be submitted to the Board no later than Wednesday, April 2, 2014. Also, the summary will be made a part of the Administrative Record for the site.

Please let me know if you have any questions on this.

Regards,

Gary Miller
